————— The most powerful energy advisor available —————

Introducing Emberpulse®, your energy management system

Emberpulse® is an intelligent in-home system that monitors and advises you how to reduce your energy costs and earn more from your solar system.

Emberpulse® will identify specific saving opportunities for your home that can save you hundreds of dollars each year.

Emberpulse® is installed as part of your solar system. Access your live energy information as soon as your solar installation is complete.

Why energy companies hate Emberpulse®:

-  Emberpulse® ensures you're always on the best energy plan[†]
-  Emberpulse® will save you money by pinpointing the best time to install a home battery
-  Emberpulse® guarantees to notify you of a solar system outage[#]
-  Emberpulse® will tell you when to use your solar in real time

emberpulse®

Turning the tables on the energy companies

Energy bills have increased over 113% in 10 years. We're all getting ripped off.

Emberpulse® will continually scan the market and find the best electricity plan for you, based on YOUR energy usage patterns to save YOU more money†.

Always be on the best electricity plan!

	Current plan	\$1,465 p.a.
	New plan	\$1,194 p.a.
	Savings	\$271 p.a.

Guaranteed solar outage protection

Emberpulse® also provides solar monitoring. Did you know that solar system outages usually go undiagnosed for up to 4 months, costing you over \$600.

Emberpulse® guarantees to protect your solar investment by notifying you of an outage – if we don't, we'll pay you for your lost solar revenue. This is an offer not available anywhere else.
